Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, 21 and 22, drawn to in vitro methods of measuring neurotransmitter uptake and searching for modulators of neurotransmitter uptake, by measuring transport of ASP⁺; classified in class 435, subclass 7.1+.
- II. Claim 20, drawn to in vivo methods of measuring neurotransmitter uptake and searching for modulators of neurotransmitter uptake, by measuring transport of ASP⁺; classified in class 514, subclass 2+.
- III. Claims 23 and 24, drawn to methods of treatment by adding a modulator of a neurotransmitter transporter; classified in class 514, subclass 2+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are directed to related methods. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the methods of Inventions I-III are distinct, each from the other, in vitro binding assays using ASP⁺ encompass different subjects (cultured cells versus animals), different conditions, different protocols, different personnel, and have differing chances of success than in vivo binding methods or treatment methods.

Art Unit: 1647

Because these inventions are distinct for the reasons given above, as well as by their different classifications, divergent subject matter and different search requirements, restriction for examination purposes as indicated is proper.

In response to this requirement, applicants must elect from Groups I through III. Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).
